

- Fanuc robots being used in paint shop**
- Not enough application “presets”**
- Contact Ritchie Automation**

**Ritchie Automation has the solution for expanding the application “presets” for the fluid, atomization, fan, & high voltage set points available in your Fanuc robot.**

Our easy-to-use, PLC based system offers nearly unlimited “preset” expansion capabilities to be added to your finishing system.

Reliable Allen-Bradley ControlLogix components coupled with Ritchie Automation’s controls engineering expertise provides a means to extend your finishing operation into the future.

System Overview screen shows current “preset” for all robots taking the guess work out of where your system is operating.

**Call us now or contact us via our website.**
